IN THE SPECIFICATION:

Please replace paragraph **[0075]** with the following rewritten paragraph:

[0075] In one aspect, the user 54 is an employee of the gaming ~~established~~ establishment where the gaming system 14 is operating. Typically, the user 54 has an assigned role (or type) based on their job description. Typical roles may include, but are not limited to, system administrator, supervisor, pit, pit manager, slot floor employee, patron host, player's club, security, security supervisor, slot attendant, slot director, slot shift supervisor, slot technician, sports and racebook, surveillance, and table supervisor.

Please replace paragraph **[0082]** with the following rewritten paragraph:

[0082] As shown in Figure 3, the computer program application 20 implements a remote network interface [~~66~~] 68. The remote network interface 68 couples the web client 56 with the database 22. In one embodiment, the remote network interface 68 obtains data from the database 22, formats the data, e.g., into an HTML response, and returns the formatted data to the web client 56.

Please replace paragraph **[0090]** with the following rewritten paragraph:

[0090] The menu layer 90 allows the user 54, once logged on, to navigate to and between servlets. The servlets are downloaded to the remote device 50 from the [~~hose~~] host computer 18 as needed. The menu layer 90 also handles providing access to those servlets to which the user 54 has access, typically based on an assigned role (see above).

Please replace paragraph **[00128]** with the following rewritten paragraph:

[00128] With specific reference to Figure 10, in one embodiment the returned asset information is displayed on the remote device 50A in a remote asset information screen 178. In the illustrated embodiment, the asset information may include, but is not limited to, an asset number, a device number, a denomination (the base denomination the device accepts) , a manufacturer, a model, a master prom identifier, a game prom identifier, an online MAC address, an online TCP/IP address, a date on floor, and any or all available system meters, such as, coin in, coin out, games [player] played, and jackpots.
